EDUCATION

University of Florida, *Gainesville, FL* *Expected May 2027*
Master of Science (M.S.) in Computer Science
GPA: 3.83/4.0

University of North Florida, *Jacksonville, FL* *May 2025*
Bachelor of Science (B.S.) in Computer Science, Minors in Mathematics and International Business
GPA: 3.99/4.0
• Undergraduate Research, Systems Programming, Software Engineering, Applied Machine Learning.

Sungkyunkwan University, *Seoul, South Korea* *Feb 2024 - Jun 2024*
Exchange Program, Data Science
• Completed coursework in data science and AI applications in an international academic setting.

WORK EXPERIENCE

UF Information Technology *Jan 2026 - Present*
Research Computing Support Intern
• Developed a Python CLI and Django-Ninja API for querying 800M+ rows of Lmod data on HiPerGator, enabling efficient analysis by support staff.
• Containerized and deployed the API and PostgreSQL database using Podman Quadlet, implementing JWT-based authentication for secure access.
• Optimized query performance using nightly precomputed tables, reducing latency from minutes to milliseconds.

Avondale United Methodist Church *Aug 2019 - Jun 2025*
Web Developer
• Designed, coded, and maintained the church website using HTML, CSS, JavaScript, and PHP, serving 50+ members.
• Implemented a pictorial directory, migrating hand-collected forms to 20+ member entries using server-side scripting.
• Collaborated with trustees and staff from various departments to define design and content requirements.

PROJECTS

MARCC: Multi-Agent Area Coverage via Deep Reinforcement Learning
• Designed and trained multi-agent RL systems (CNN, DQN, PPO) using PyTorch and RLlib for large-scale area coverage.
• Achieved ~99% coverage and connectivity with 20–50 robots, 15% higher average coverage than prior work.
• Built modular experimentation framework enabling rapid iteration on reward functions and hyperparameters.

UF Marketplace
• Led backend development of a full-stack marketplace using Go (Gin), building a REST API with JWT-based auth.
• Designed and indexed relational schemas with GORM (SQLite), optimizing query performance for listings and user data.
• Engineered cursor-based pagination for listings, improving scalability and reducing query latency for large datasets.

AeroAtlas Travel Planner
• Built a full-stack travel itinerary planner using Agile methodologies, Next.js, Supabase, and ShadCN components.
• Integrated third-party APIs with FastAPI, using in-memory caching to reduce latency and improve response times.
• Won the Audience Choice Award at the 2025 UNF School of Computing Symposium against 20+ teams.

SKILLS

• Languages: Python, Go, Java, C, HTML/CSS, SQL, TypeScript
• Frameworks: PyTorch, Scikit-Learn, Gymnasium, Ray RLlib, NumPy, Django/Ninja, FastAPI, Gin, Gorm
• Tools/Infra: Conda, Docker/Podman (Quadlet), UV, PostgreSQL, Linux, HPC, Git, Jira

AWARDS/CERTIFICATIONS

• Building Transformer-Based Natural Language Processing (NLP) Applications, *NVIDIA*
• 2nd place out of 50 teams, Fall 2024 UNF NestforAwhile Programming Challenge
• Unix Essential Training, *LinkedIn*
