EDUCATION

University of Florida, Gainesville, FL May 2025 — May 2027
Master of Science, Computer Science

University of North Florida, Jacksonville, FL May 2021 — May 2025
Bachelor of Science, Computer Science
Minors in Mathematics and International Business
GPA: 3.99/4.0

Sungkyunkwan University, Seoul, South Korea Mar 2024 — Jul 2024
Exchange Program, Data Science
GPA: 4.0/4.0

PROJECTS

Multi-Agent Reinforcement Learning for Coordinated Grid Exploration

- Architected custom neural networks in PyTorch for use with the Proximal Policy Optimization (PPO) algorithm, leveraging Ray RLlib to streamline the training process.
- Built a modular framework with custom reward functions, hyperparameter tuning, and ablation study support.
- Logged and visualized performance with TensorBoard and Pandas for greater interpretability.
- Achieved ~99% coverage and connectivity with 20-50 robots, 15% higher average coverage than prior work.
- Submitted to ICRA 2025, currently under review.

AeroAtlas Travel Planner

- Built a full-stack travel itinerary planner using Agile methodologies to coordinate with teammates, delivering an award-winning MVP at the UNF School of Computing Symposium against 20+ teams.
- Developed a modern, responsive UI with Next.js, React, TailwindCSS, and ShadCN components.
- Designed and implemented a REST API with FastAPI to integrate multiple external services, optimized with caching to significantly reduce average page load times.

Raspberry Pi Dashboard

- Developed a real-time dashboard for the Raspberry Pi 4B using JavaFX, displaying system metrics with multithreaded data handling.
- Integrated terminal access, file manager, and GPIO controls into a responsive CSS-styled interface.
- Optimized resource management to ensure stability and performance under concurrent processes.

WORK EXPERIENCE

Avondale United Methodist Church Aug 2019 — Jun 2025
Web Designer / Webmaster

- Designed, coded, and maintained the church website using HTML, CSS, JavaScript, and PHP, serving 50+ members.
- Collaborated with trustees and staff from various departments to define design and content requirements.
- Maintained weekly bulletins and announcements via SFTP to ensure timely site updates.

River and Post Restaurant Nov 2020 — July 2021
Busser

- Coordinated with front-of-house staff to deliver attentive service to 100+ customers in a fast-paced environment.
- Trained and supported 2 new team members, fostering a cooperative and efficient work environment.

SKILLS

• Python, PyTorch, Gymnasium, NumPy, Pandas, Java, HTML, CSS, JavaScript, Scikit-learn, React.js, C, SQL, ASM

AWARDS/CERTIFICATIONS

- Building Transformer-Based Natural Language Processing (NLP) Applications, *NVIDIA*
- 2nd Place out of 50 teams, Fall 2024 UNF NestforAwhile Programming Challenge
- Unix Essential Training, *LinkedIn*
