EDUCATION

University of Florida, *Gainesville, FL* *Expected May 2027*
Master of Science (M.S.) in Computer Science
GPA: 3.83/4.0

University of North Florida, *Jacksonville, FL* *May 2025*
Bachelor of Science (B.S.) in Computer Science, Minors in Mathematics and International Business
GPA: 3.99/4.0 | *Summa Cum Laude* | Hicks Honors College

WORK EXPERIENCE

Florida Blue *May 2026 – Present*
Information Technology Intern – Software Engineering
• Develop an application to manage, standardize, and track relational migration resources using React.js/Express.js and Java Spring Boot, targeting 8–10 hours of weekly time savings by eliminating manual database operations.
• Validate backend correctness with SQLite-based unit tests, benchmark SQL Server query response times, and test deployments using Jenkins and OpenShift while maintaining system design documentation and Agile user stories.
• Implement SQL Server transactions with pessimistic locking and timestamp-based optimistic concurrency checks to prevent conflicting updates across multi-record resources.

UFIT Research Computing *Jan 2026 – Aug 2026*
Research Computing Support Intern
• Built a Python CLI and Django REST API to query 800M+ HiPerGator usage records; containerized the API and PostgreSQL database with Podman Quadlet and secured endpoints using RS256 JWT authentication.
• Accelerated HPC module deprecation checks by 10–30× by caching read-heavy filesystem module data in PostgreSQL tables, refreshed hourly via Slurm cron jobs, and automated daily usage data ingestion for 3700+ users.

PROJECTS

MoTorch Neural Network Library *Apr 2026 – Jul 2026*
• Built a PyTorch-inspired deep learning framework with neural network modules, optimizers, and loss functions.
• Implemented a reverse-mode autodiff engine with a dynamic computational graph for backpropagation.
• Automated CI and testing with GitHub Actions, benchmarking across linear models with up to 32.6 million parameters.

UF Student Marketplace *Feb 2026 – Jul 2026*
• Engineered real-time messaging in Go using WebSockets and concurrent client read/write goroutines.
• Replaced database blobs with scalable cloud-based object storage by integrating AWS S3 with a Gin REST API.
• Designed and indexed relational schemas with GORM and SQLite for listings, messaging, and user workflows.

AeroAtlas Travel Planner *Feb 2025 – Apr 2025*
• Created a full-stack travel itinerary planner using Agile methodologies, Next.js, Supabase, and ShadCN components.
• Integrated third-party APIs with FastAPI, leveraging in-memory caching to reduce latency and improve response times.
• Earned the Audience Choice Award at the 2025 UNF School of Computing Symposium, competing against 20+ teams.

RESEARCH

ICTAI 2026 - *Scalable Multi-robot Coverage with Connectivity Maintenance Via Deep Reinforcement Learning*
Corrieri Jacomo, Kulbaka Iliya, Ghosh Anirban, Dutta Ayan
• Architected a MARL experimentation framework for CNN-based PPO and DQN models with PyTorch and Gymnasium.

SKILLS

Languages: Python, Go, C++, Java, TypeScript, SQL
Frameworks & Libraries: FastAPI, Django, Gin, React, PyTorch, NumPy, Scikit-Learn, Gymnasium, Ray RLlib
Databases & Cloud: PostgreSQL, SQL Server, SQLite, AWS S3
Infrastructure & Tools: Linux, Slurm, Git, GitHub Actions, Podman, systemd, Jira, Confluence
