EDUCATION

University of Florida, Gainesville, FL

May 2027

Master of Science (M.S.) in Computer Science

GPA: 3.66/4.0

Relevant Coursework: Computer Vision, Machine Learning Engineering.

University of North Florida, Jacksonville, FL

May 2025

Bachelor of Science (B.S.) in Computer Science, Minors in Mathematics and International Business

GPA: 3.99/4.0

Relevant Coursework: Machine Learning with Graphs, Graph Theory, Data Structures, Algorithms
Vector Calculus, Ordinary Differential Equations, Probability and Statistics, Software Engineering,
Linear Algebra, Databases, Operating Systems.

Sungkyunkwan University, Seoul, South Korea

Feb 2024 - Jun 2024

Exchange Program, Data Science

Relevant Coursework: AI and IT Business Models, Data Science and R, Platform Business

WORK EXPERIENCE

UF Information Technology

Jan 2026 - Present

Research Computing Support Intern

- Troubleshoot, debug, and install High Performance Computing (HPC) applications on HiPerGator (Python, C++, R).
- Develop a CLI tool using Django, Python, and PostgreSQL, enabling efficient querying of 700M+ rows of Lmod data.
- Containerize and deploy Django-Ninja API and database using Podman Quadlet with API key-based authentication.

Avondale United Methodist Church

Aug 2019 - Jun 2025

Web Developer

- Designed, coded, and maintained the church website using HTML, CSS, JavaScript, and PHP, serving 50+ members.
- Implemented a pictorial directory, migrating hand-collected forms to 20+ member entries using server-side scripting.
- Collaborated with trustees and staff from various departments to define design and content requirements.

PROJECTS

MARCC: Multi-Agent Area Coverage via Deep Reinforcement Learning

- Architected CNN-based DQN and PPO networks for multi-agent RL with PyTorch and Ray RLlib.
- Built a modular Python framework with custom reward functions, hyperparameter tuning, and data collection.
- Achieved ~99% coverage and connectivity with 20–50 robots, 15% higher average coverage than prior work.

AeroAtlas Travel Planner

- Built a full-stack travel itinerary planner using Agile methodologies, Next.js, TailwindCSS, and ShadCN components.
- Implemented a REST API with FastAPI, integrating external services with in-memory caching.
- Won the Audience Choice Award at the 2025 UNF School of Computing Symposium against 20+ teams.

Raspberry Pi Dashboard

- Displays real-time system metrics with multithreaded data handling using Java/Linux over SSH.
- Integrated Unix terminal access, file manager, and GPIO controls into a responsive CSS-styled interface with JavaFX.
- Optimized resource management to ensure stability and performance under concurrent processes.

SKILLS

Python, Go, Java, C, HTML/CSS, SQL, PyTorch, Angular, Django-Ninja, FastAPI, Gymnasium, Ray RLlib

AWARDS/CERTIFICATIONS

- Building Transformer-Based Natural Language Processing (NLP) Applications, *NVIDIA*
- 2nd place out of 50 teams, Fall 2024 UNF NestforAwhile Programming Challenge
- Unix Essential Training, *LinkedIn*
