EDUCATION

University of Florida, Gainesville, FL

May 2027

Master of Science, Computer Science

GPA: 3.7/4.0

Relevant Coursework: Computer Vision, Analysis of Algorithms, Math for Intelligent Systems.

University of North Florida, Jacksonville, FL

May 2025

B.S. in Computer Science, Minors in Mathematics and International Business

GPA: 3.9/4.0

Relevant Coursework: Machine Learning with Graphs, Algorithms, Graph Theory, Data Structures, Linear Algebra, Vector Calculus, Ordinary Differential Equations, Probability and Statistics, Software Engineering, Databases, Operating Systems.

WORK EXPERIENCE

UF Information Technology

Jan 2026 - Present

Research Computing Support Intern

- Troubleshoot, debug, and install High Performance Computing (HPC) applications using Linux.
- Develop internal applications using Django, Python, and PostgreSQL.
- Provide tier one customer support to HiPerGator supercomputer users.

Avondale United Methodist Church

Aug 2019–Jun 2025

Web Developer

- Designed, coded, and maintained the church website using HTML, CSS, JavaScript, and PHP, serving 50+ members.
- Implemented a pictorial directory, migrating hand-collected forms to 20+ member entries using server-side scripting.
- Collaborated with trustees and staff from various departments to define design and content requirements.

PROJECTS

Multi-Agent Reinforcement Learning for Coordinated Grid Exploration

- Architected custom neural networks in PyTorch for use with the Proximal Policy Optimization (PPO) algorithm, leveraging Ray RLlib to streamline the training process.
- Built a modular framework with custom reward functions, hyperparameter tuning, and ablation study support, enabling seamless experimentation and testing.
- Final model achieved ~99% coverage and connectivity with 20–50 robots, 15% higher average coverage than prior work, motivating paper submission.

AeroAtlas Travel Planner

- Built a full-stack travel itinerary planner using Agile methodologies to coordinate with teammates, delivering an award-winning MVP at the UNF School of Computing Symposium against 20+ teams.
- Developed a modern, responsive UI with Next.js, React, TailwindCSS, and ShadCN components.
- Designed and implemented a REST API with FastAPI to integrate multiple external services, leveraging in-memory caching to reduce average page load times significantly.

Raspberry Pi Dashboard

- Developed a real-time dashboard for the Raspberry Pi 4B using JavaFX, displaying system metrics with multithreaded data handling.
- Integrated Unix terminal access, file manager, and GPIO controls into a responsive CSS-styled interface.
- Optimized resource management to ensure stability and performance under concurrent processes.

SKILLS

Python, Go, Java, C, C++, HTML, CSS, TypeScript, Angular, SQL, PyTorch, Gymnasium, FastAPI, Git, Linux, HPC

AWARDS/CERTIFICATIONS

- Building Transformer-Based Natural Language Processing (NLP) Applications, *NVIDIA*
- 2nd place out of 50 teams, Fall 2024 UNF NestforAwhile Programming Challenge
- Unix Essential Training, *LinkedIn*
