EDUCATION

University of Florida, Gainesville, FL
Master of Science, Computer Science

May 2027

University of North Florida, Jacksonville, FL
Bachelor of Science, Computer Science
Minors in Mathematics and International Business
GPA: 3.99/4.0

May 2025

Sungkyunkwan University, Seoul, South Korea
Exchange Program, Data Science
GPA: 4.0/4.0

Mar 2024 - Jul 2024

PROJECTS

Multi-Agent Reinforcement Learning for Coordinated Grid Exploration

- Architected custom neural networks in PyTorch for use with the Proximal Policy Optimization (PPO) algorithm, leveraging Ray RLlib to streamline the training process.
- Implemented a modular project structure supporting hand-crafted reward functions, hyperparameter tuning, and easily customizable models, enabling seamless experimentation and ablation study.
- Logged metrics using Tensorboard and Pandas, improving the interpretability of model performance.

AeroAtlas Travel Planner

- Built a full-stack travel itinerary planner using Agile methodologies to coordinate with teammates, delivering an award-winning MVP at the UNF School of Computing Symposium.
- Developed a modern, responsive UI with Next.js, React, TailwindCSS, and ShadCN components.
- Designed and implemented a REST API with FastAPI to integrate multiple external services, optimized with caching to significantly reduce average page load times.

Raspberry Pi Dashboard

- Built a custom dashboard interface for the Raspberry Pi 4B using JavaFX with real-time system metrics, multithreading, terminal access, file manager, a GPIO control panel, and CSS-styled UI.

WORK EXPERIENCE

Avondale United Methodist Church
Web Designer / Webmaster

Aug 2019 – Jun 2025

- Designed, coded, and maintained the church website using HTML, CSS, JavaScript, and PHP.
- Collaborated with trustees and staff to define design and content requirements.
- Maintained weekly bulletins and announcements via SFTP to ensure timely site updates.

River and Post Restaurant
Busser

Nov 2020 – July 2021

- Coordinated with front-of-house staff to deliver attentive customer service in a fast-paced environment.

SKILLS

- **Programming Languages:** Python, Java, C, JavaScript, SQL, HTML, CSS, ASM
- **Frameworks & Libraries:** PyTorch, Scikit-learn, Tailwind CSS, Gymnasium, NumPy, Pandas
- **Tools & Technologies:** Git, Unix, Windows, SFTP, IONOS web hosting.

AWARDS/CERTIFICATIONS

- Building Transformer-Based Natural Language Processing (NLP) Applications, *NVIDIA*
- 2nd Place, Fall 2024 UNF NestforAwhile Programming Challenge
- Unix Essential Training, *LinkedIn*
